## Research Papers

Stable nitrogen isotopes in Angola Basin surface sediments M.E. Holmes, P.J. Müller, R.R. Schneider, M. Segl, J. Pätzold and G. Wefer .....	1
Sediment stability on the western flanks of the Canary Islands J.A. Roberts and A. Cramp .....	13
Determining the composition of late Quaternary marine sediments from NUV, VIS, and NIR diffuse reflectance spectra W.L. Balsam and B.C. Deaton .....	31
Carbon and nutrient geochemistry of the surface sediments of the Gulf of Riga, Baltic Sea R. Carman, J. Aigars and B. Larsen .....	57
Field observations of beach cusps and swash motions K.T. Holland and R.A. Holman .....	77
An assessment of a time-of-transition laser sizer in measuring suspended particles in the ocean C.-H. Tsai .....	95
Distribution of recent benthic foraminifera in a subarctic fjord-delta: Tana, Norway G.D. Corner, P.I. Steinsund and R. Aspeli .....	113
Lowstand terraces on Tyrrhenian Sea steep continental slopes F.L. Chiocci and L. Orlando .....	127
1300 km long late Pleistocene-Holocene shelf edge barrier reef system along the western continental shelf of India: occurrence and significance K.H. Vora, B.G. Wagle, M. Veerayya, F. Almeida and S.M. Karisiddaiah .....	145
Bioclastic carbonate sediments on the southwestern Svalbard shelf H. Andruseit, A. Friewald and P. Schäfer .....	163
Holocene history of the Baltic Sea as recorded in a sediment core from the Gotland Deep G. Sohlenius, J. Sternbeck, E. Andrén and P. Westman .....	183
Late Weichselian to early Holocene subaqueous dune formation and burial off the North Sea Northumberland coast D.S. Brew .....	203
Oceanography and sedimentation in the semi-enclosed, deep-water Gulf of Corinth (Greece) S.E. Poulos, M.B. Collins, C. Pattiaratchi, A. Cramp, W. Gull, M. Tsimplis and G. Papatheodorou .....	213
Diapiric features in the southeastern Mediterranean Sea: possible indication of extension in a zone of incipient continental collision D. Kempler, Y. Mart, B. Herut and F.W. McCoy .....	237
Sea-floor spreading in the easternmost Indian Ocean reveals cyclicity in ocean crust accretion (0-36 Ma) E. Lodolo, A.A. Schreider and F. Coren .....	249
Erratum .....	263
Contents Volume 134, 1996 .....	265
